Faraz Ahmad

North York, ON | 416-523-0496 | faraz04@my.yorku.ca | Album Portfolio | LinkedIn

Enrolled in Long-Term Internship Program | 12–16 Months Availability (Starting May 2027)

Education

Lassonde School of Engineering, York University — Toronto, ON
Bachelor of Engineering (B.Eng) – Civil Engineering Specialization (Honours) — Sep. 2025 – Present

- **Relevant Coursework:** AutoCAD, Multivariable Calculus, Engineering Economics, Material Design
- **Academic Achievements:**
  - 1st Place – CEL Bridge Building Competition (88.5kg load capacity)
  - 1st Place – Space Robotics Competition (4/5 challenges completed)

Experience

General Carpenter — Jan. 2024 – Aug. 2025
Carpenters Local 27 — Toronto, ON

- Constructed structural forming, interior partitions, mass timber, and finish framing across commercial jobsites.
- Adhered strictly to site safety standards for high-risk tasks requiring Working at Heights and Confined Spaces certification.
- Collaborated efficiently in fast-paced trade environments to deliver precise workmanship while maintaining an accident-free record.

Youth Coordinator & Mentor — Nov. 2022 – Nov. 2025
MKAC — North York, ON

- Mentored 30+ youth through weekly skill-building workshops, public speaking classes, and regional sports tournaments.
- Coordinated charity food drives and directed educational/sports activities for annual regional youth conventions.
- Managed event operations, budgetary planning, prize distribution, venue beautification, and volunteer team logistics.

Engineering & Technical Projects

Desk Study Productivity Bot — Jan. 2026
Implementation Officer (IO)

- Designed and engineered an interactive desk bot equipped with proximity sensing, task lists, timers, and lives tracking.
- Co-authored a comprehensive technical report, engineered a formal design poster, and delivered a live pitch presentation.

RFID Access Security System — Jan. 2026
Hardware & Access Control Developer

- Built an automated access control gate using an Arduino UNO R3, RFID scanner, and servo motor latch.
- Assembled custom wiring, an LCD status screen, and a desktop dashboard GUI to monitor access logs in real time.

Automatic Soil Irrigation System — Nov. 2025
Hardware & Logic Designer

- Developed an automated system utilizing a moisture sensor, micro-controller, water pump, and tactile delay integrated via MATLAB.
- Programmed hardware response logic based on real-time voltage, soil moisture content, and precise water volume output.

Certifications & Skills

- **Certifications:** 'G' License (Vehicle Owned), CPR C & First Aid, Drone Basic License, Working at Heights, WHMIS
- **Software & Design Tools:** AutoCAD, MS Office, Civil3D, MATLAB, TinkerCAD
- **Technical Competencies:** Micro-controller Integration, Forming, Interior Partitions, Mass Timber Construction
